How to Transition Off Screens

1. As much as possible, try to plan for screen time in the daily schedule. Make the times reasonable for your child's age.

2. Use a timer or clock to let your child know how much screen time they have so that they know what to expect.

3. Try to avoid planning screen time before non-preferred activities. For example, it might be easier to transition your child from screen time to snack than it would be to transition from screen time to an academic task.
